

Sun Valley Watershed Upper Storm Drain System Phase 1

- **Project Scope:**

The primary objective of the project is to install 4,300 linear feet of underground storm drain pipes that will convey water to the future Rory Shaw detention ponds. The project includes installation of reinforced concrete pipes, catch basins, connector pipes, and other drainage elements.

- **Project Benefits:**

Will reduce local flooding in the area.

- **Community Outreach:**

A project information flyer and a pre-construction brochure will be provided just after the project has been awarded and a week prior to start of construction, respectively.

- **Project Page:**

<https://www.dpw.lacounty.gov/wmd/svw/upperstormdrain>

- **Project Location:**

Project is located within the Sun Valley Community in the City of Los Angeles.

- Tujunga Ave - 1800 feet south of Penrose St to 800 feet north of Penrose St.
- Penrose St - Tujunga Ave to 300 feet west of San Fernando Rd

- **Cost Estimate:**

Total Project: \$15,400,000

Construction: \$10,400,000

- **Economic Impact:**

Project construction supports 130 direct and indirect jobs.

- **Schedule:**

- Final Plans – Spring 2020
- Advertise for Construction Bids – Fall 2020
- Start of Construction – Spring 2021

Note - Dates subject to change
